Vineyard: We practice a traditional reasoned viticulture: planting grass between the rows in order to control the vigour of the plant, limitation of the number of bunches, soil tillage. Thanks to this work, we haven't used any products for grey mould over the last three years.

Terroir: *La Commanderie* at Preuilly : vines planted in 2003 on clayey gravel of quaternary sedimentary terraces settled by the rivers which shaped the valley of the Cher.

Vintage 2015 : The agro-climatic context has produced a true solar vintage ... Extremely good! The mild spring in April , causes the buds not to burst until the end of the month. Phew! No frost ...

The lovely stimulating month of May, induces the vines to flower early.

In late May, a heat wave of 30° C occurs and smothers some of the future grape seeds.

Instead of 80/100 grapes per bunch, it falls to 30/60 grapes . . . consequently the harvest is reduced.

At last a real summer! Hot and dry, making the protection against fungal attacks easier.

Finally, plenty of rain in August restarts and unlocks the maturation of the grapes.

Result: early harvests starting on September 7th, almost two weeks ahead of time!

- Vinification:**
- Grapes are hand harvested in small boxes.
